SCUFF-X[®]

Unmatched Durability for
High-Traffic Commercial Areas

Cutting-Edge Protection Against Scuffs and Chipping

Benjamin Moore, the leader in colour and coatings technology, engineered Scuff-X® interior latex paint in four ultra durable, high-performance sheens for high-traffic commercial environments. Scuff-X matte, eggshell and pearl sheens protect against scuffing on walls exposed to high traffic. Scuff-X semi-gloss sheen with chip-resistant technology (Chip-Tech®) protects against chipping on trim, baseboards, columns and other surfaces exposed to irregular impacts.

Hospitality Venues

In an industry defined by exceptional customer service, extended downtimes for painting, and constant touch-ups are not always an option. With its quick dry time formula, Scuff-X® lets you paint high-traffic guest rooms, hallways, lobbies, stairwells and dining rooms with minimal disruption and rapid return to service. In busy hotels, restaurants and other hospitality venues where first impressions count, Scuff-X will help you keep walls, windows, doors, and trim in pristine condition with minimal maintenance required.

Educational Institutions

From dodgeball to dorm life, student activities can take a toll on primary, secondary and higher education learning spaces. Scuff-X® lets you paint high-traffic corridors, lecture halls, gymnasiums, locker rooms and dormitories quickly and with minimal disruption to student learning. Four different sheens of Scuff-X keep walls, windows, doors and trim looking freshly painted. Plus, its low-VOC formula qualifies for CHPS (Collaborative for High Performance Schools) low emitting credit.

Healthcare Facilities

For environments where patient health is of primary concern, maintaining clean, unsoiled walls is vital. Scuff-X® resists scuffing on walls, and its semi-gloss finish resists chipping on trim. The proprietary formula is low-VOC, making it an ideal choice for busy waiting areas, exam rooms and laboratories in hospitals, clinics, nursing homes and therapeutic facilities. Plus, Scuff-X qualifies for LEED® v4 credit and it contains antimicrobial additives that inhibit the growth of mould and mildew on the surface of the paint film.

Corporate Establishments

Time is money, so repeatedly maintaining corporate conference rooms, offices, lobbies and hallways can be especially costly. You can apply fast-drying Scuff-X® in occupied spaces that can be quickly returned to service for minimal disruption to business. Its proprietary scuff-resistant formula will continue to protect against scuffs long after other paints have failed, potentially yielding lower maintenance costs over time and helping your bottom line.

Retail Environments

When it comes to the customer experience, well-dressed mannequins may be as impactful as well-dressed walls, windows, doors and trim. Protect walls from unsightly scuffing—and trim from chipping—caused by racks, carts and hangers with Scuff-X®, the high-performance coating that withstands the abuse caused by everyday people traffic. Plus, walls and trim wash clean with simple soap and water for minimal maintenance. Scuff-X helps deliver the shopping experience customers deserve.

Scuff-X® Outperforms the Competition

Our innovative, scuff-resistant technology delivers superior protection, scuff resistance and washability without damaging the paint, for ultimate long-term durability.

¹Theoretical coverage (sq. m. [sq. ft.]) per 3.79 L at recommended film thickness. ²Dry time at 25 °C (77 °F) at 50% RH.

Key Benefits:

- Patented scuff resistant technology protects walls from the toughest scuff marks
- Patented Chip-Tech® technology to withstand the glancing blows and irregular hits (semi-gloss only)
- High-performance in a latex formula
- Single-component – easy to apply
- Withstands repeated washing
- Low VOCs – meets the most stringent VOC regulations
- Quick-drying for minimal disruption and fast job turnaround
- Available in thousands of Benjamin Moore® colours

Key Uses:

- Hospitality venues
- Educational institutions
- Healthcare facilities
- Corporate establishments
- Retail environments
